PROPOSAL FOR Managed Wireless Access Point

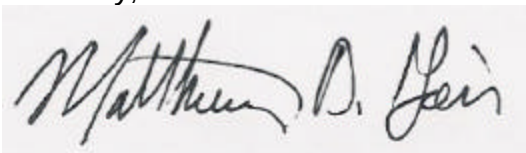

Dear Tomas,

Thank you for your interest in Melior, Inc. and the opportunity to introduce to you our unique managed WAP offering.

In the following proposal we offer solutions for immediate deployment.

We are readily available to work with you at any time to commence your project.

Sincerely,

Matt Gair
Co-Founder and Vice President Strategic Business Development

Melior, Inc.

United States of America – Europe – Asia
US HQ: 1501 Beaumont Street, Dallas, Texas 75215

About Melior, Inc. – Background

Melior, Inc. is a highly specialized computer security company with a long history of providing high-end security solutions, with its roots dating back to 1987 to Germany. In 1996, Melior moved to the United States, and has recently – with the development of iSecure – transformed from a services company to a product company with augmenting services.

Melior is headquartered in Dallas, Texas, USA, with offices and technical personnel in Europe and India.

Melior personnel have a rich background in infrastructure and security; it has built a \$20m data center in San Jose (Silicon Valley, 1998/1999), designed and implemented the worldwide infrastructure for the Macromedia Shockwave Downloads (1995/1996), linked merging banks together (Bank of America & Nations Bank, 1998), deployed the first Point-of-Presence co-lo replication servers on the Internet (1996), and made recently Internet history again by launching the first dDoS-safe hosting environment and demonstration web server (2003).

Melior is also currently the only company on the Internet to offer a fully cloaked hosting solution, which is safe against all forms of Denial-of-Service attacks (bandwidth flooding, network attacks, and application-level attacks).

In addition Melior has select experience in Wi-Fi deployment and integration for scalable and secure wi-fi services.

Convenient. Efficient. Secure. The Competitive Advantage.

Our Dallas public access point rated #7 nation-wide by WIRED magazine (May 2003)

Melior, Inc. offers design, implementation, security, and [management](#) for the full spectrum of wireless data services based on the 802.xx specifications.

Melior, Inc. offers many configurations for commercial and public use:

- Public Networks for your customers and guests
- Internal networks with high security implementation or dual public/secure wireless networks
- Complex Networks for large buildings, skyscrapers, etc.
- Networks spanning multiple sites

Avoid costly wiring of office space, add to the convenience of your tenants, employees, visitors, or customers, and use wireless technology. It's fast (at least 11 Mbit/s), and you can support many machines, such as desktops, laptops and Personal Digital Assistants (like Palm Pilots). With the **expertise at Melior**, you can get a system which works reliably, everywhere across your site(s), be supported 24x7 with a 4-hour hardware replacement through Cisco and can be [remotely managed](#)!

Concerned about security? At Melior, we can lock down your wireless network in a way you do not have to worry about intrusion or someone else using your bandwidth. Based on your needs, your wireless network can have standard WEP encryption or much higher security (such as [VPN](#)

7x24 Support Available via US (Dallas) or India (New Delhi)

Due to the time difference, we provide support out of our US location in Dallas as well as from India. Our support goes beyond technical considerations; we are also available to handle media events, business issues, and related support, should this become necessary.

Proposal

According to our initial discussion you had expressed interest in the collection of e-mail addresses to access this WAP. It is our opinion that this will be a tough sell for your customers; you would be better advised to solicit email addresses via a weekly raffle, and ask people to drop cards with their e-mail on it.

Installation includes:

- Cisco AiroNet Wireless Access Point
- Linux DHCP & Management Server
- Firewall to your internal network with three NICs
- Bandwidth usage report via web interface
- Travel, Installation, and template for a user guide brochure that you can make additional copies.

\$1800 of \$2400 required to retain Melior for this project and build your management system; balance due upon installation.

- Monthly Management & Support Call During business hours: \$250 flat rate, or \$29 per call billed to a credit card.

First month's support due upon installation depending on support plan elected.

We welcome your comments and look forward to serving you.
